

Diametrics Design Sdn Bhd is an innovative interior design consultancy and project management practice. Our focus is to stay creative, to constantly innovate and produce excellent design work for all our clients. Our practice comprises of a team of qualified and dynamic people passionate about their work. Our client list ranges from large corporations to individuals. Our portfolio includes offices, hotels, penthouses, clubhouses, and a diverse range of residential projects.

PHILOSOPHY

We listen carefully to our client's aspiration and needs before we put pen to paper, we believe that it makes the process more collaboration and efficient. By listening well, we help a client identify the best means to meet their needs and discover the potential of a project for them.

We do not believe in pre-conceived design solution, we see every project as an investigation; a process that influenced by functional technology, culture and visual feature.

The definition of Interior Design is not just aesthetics, but definition refers to the creation, execution, and construction according to plan, timeline and budget. It takes a lot of hard work and effort to do it well, yet this is what makes the end result so satisfying for the client and ourselves.

The capability to listen well, think carefully and work hard throughout the project process – is a deceptively simple means to an extraordinary end result: creativity itself.
